National gate hardware features a wide variety of finishes to fit any application.

A superior triple-protected finish of zinc plate, black chromate dip and satin black, baked enamel combines a stylish ornamental look with extra long life for outdoor uses.

A hot-dipped galvanized finish is perfect for outdoor utility use,

and zinc, plain steel and brass finishes are designed for applications where weather conditions are not a factor.

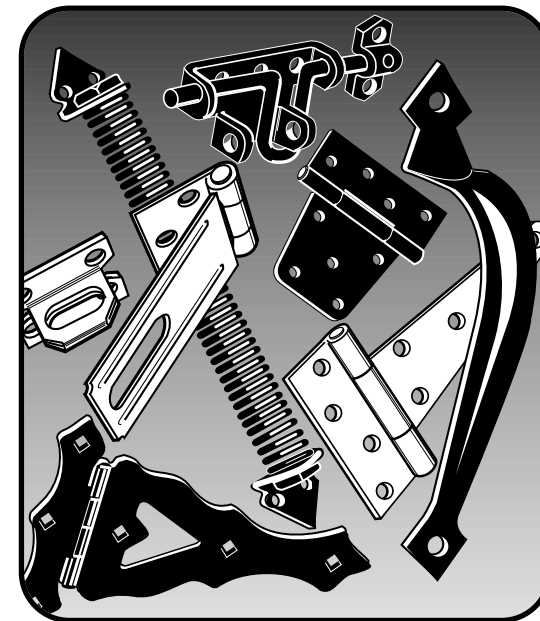

High-quality gate hardware from National is the key to a superior gate system

Proper hardware selection is critical when installing a fence and gate system. Hinges and latches must be strong enough to support gate weight under heavy traffic conditions, look appealing and stand up to adverse weather conditions. National offers gate hardware for any purpose, including top-quality ornamental hardware for decorative fences and outbuildings, to heavy-duty, utility-grade hardware for barns, sheds and livestock pens.
