

National Makes It Easy To Organize Your Tools With Perforated Board Hooks

The secret to storage is hanging items on walls on perforated panels. This opens up valuable floor space and neatly organize garages, basements, utility rooms, workshops and storage areas. Simply install perforated board panels on walls and insert National peg hooks. National has specialty peg hooks to hold or hang everything from small tools to heavy lawn and garden equipment. These hooks are made of corrosion resistant galvanized wire.

Mar-Proof Storage Hooks Are Perfect For Keeping Your Garage And Workshop Organized

National's method to utilize wall space for more storage

The best way to obtain storage space is to hang or shelve items normally stored on the floor. Odd shaped items such as garden tools, ladders, bicycles and lawn furniture are hard to store and rob you of valuable floor space in your garage or basement. National has two easy to install hanging and holding systems that will eliminate or organize storage areas for these odd-shaped items.

National's Mar-proof vinyl coated storage hooks are available in a variety of sizes and shapes for hard-to-hold items. These "easy to install" heavy-duty hooks screw directly into solid walls or ceilings and have a vinyl coating to protect your stored items from potential damage.

In addition National offers a large selection of peg hooks for perforated panels with 1/8" or 1/4" holes to hang or hold just about anything. You can organize your workshop, utility room, basement or any other areas with walls that accommodate pegboard.

These mar-proof vinyl coated hooks prevent nicks and scratches to items. Easy installation by hammering or screwing directly into solid walls or ceilings. Mar-proof hooks with special shapes make "off the floor" storage of odd-sized items such as, ladders and bicycles easy.
