

# PACKAGING OPTIONS TO FIT DIFFERENT NEEDS

The letter(s) prefix to a catalog number designates the method of packaging:

## 1. Bar Code Options

 **BC** **BAR-CODE.** Virtually all 5,000 National products are available in a bar-coded option for those customers who scan. Pre-applied bar-code labels are affixed to many bulk products, and all V-Pac or bagged items carry a UPC for quick, convenient scanning at the register. Some bulk bar-coded products are also available non-bar coded for high-volume purchases or non-scanning retailers. National also has enhanced bar-code readability by adopting the nominal bar code. This guarantees the UPC portion of the bar-code label is 100% of -- or larger than -- the industry-mandated size. All bulk bar-coded products will have a "BC" suffix, i.e., 2155BC.

## 2. Standard Packaging Options

 **V** **VISUAL PAC, V-Pac.** Items are packed on a card and blister or a card and skin pac suitable for hanging on a display hook. Products, where applicable, are packed with mounting screws.

**B** **BULK.** Items are packed loose in a box. Larger than standard box quantities are also available for high-volume requirements. Products do not include mounting screws.
